UI/UX designer for( )

# My Publications

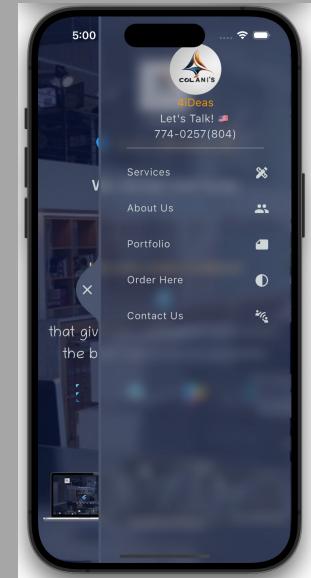

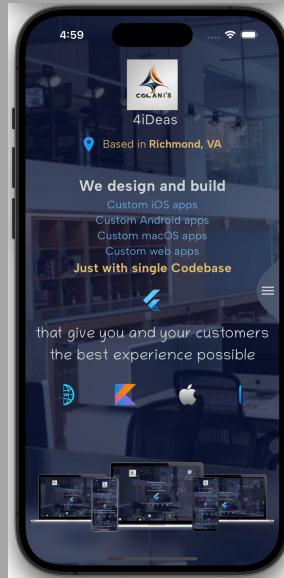

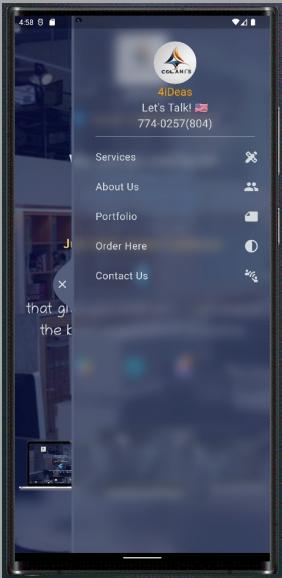

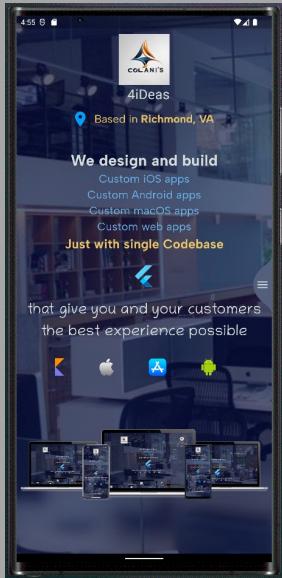

The screenshot shows a blog post titled "Testing Flutter app in less than 3 minutes" by John Colani, published 5 min read - Dec 27, 2023. The post features a large image with the text "Test in Flutter" and a magnifying glass over a mobile screen displaying a Flutter application.

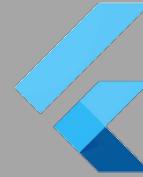

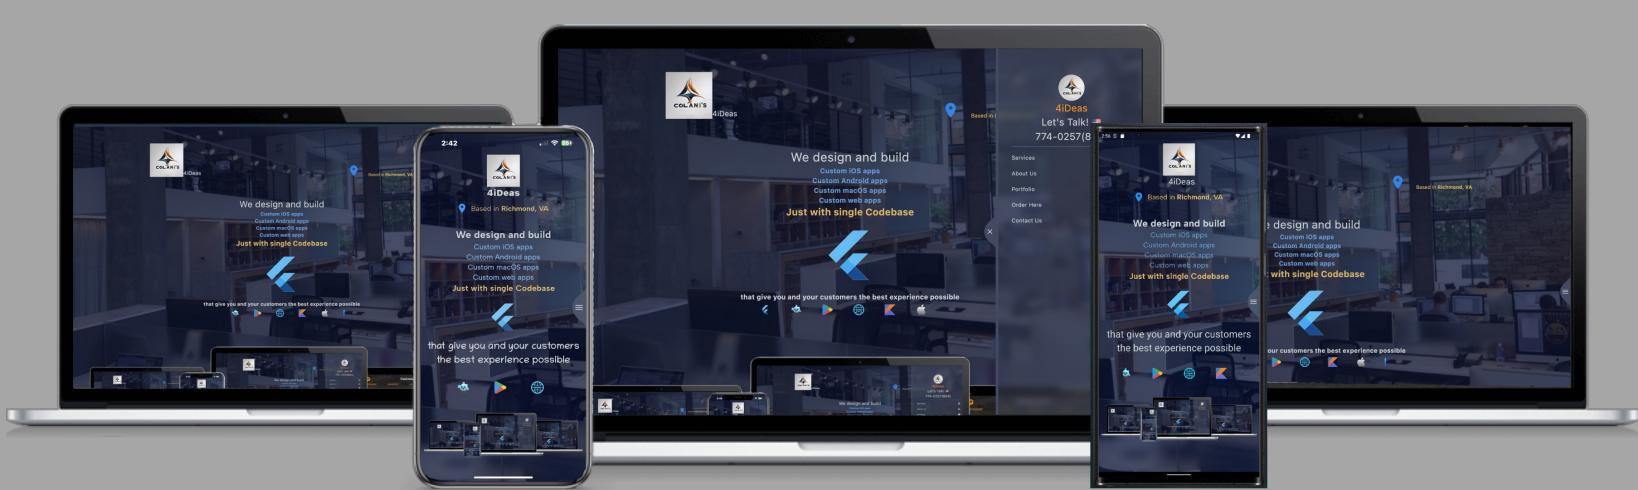

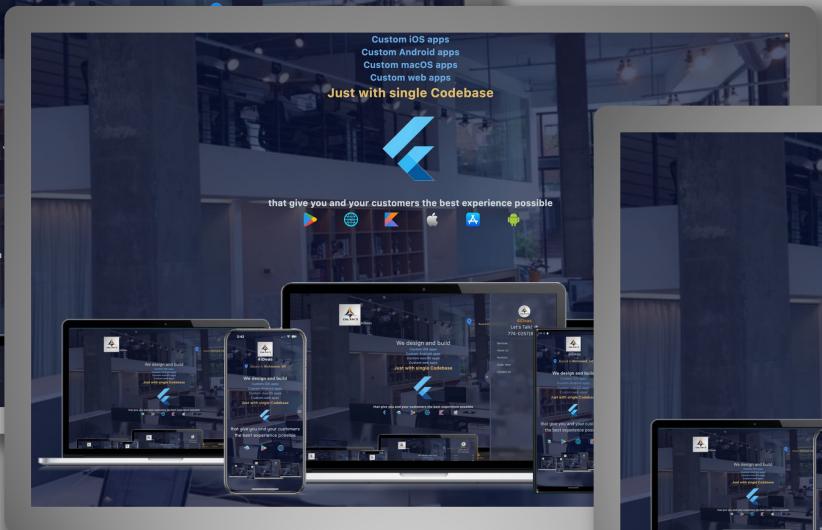

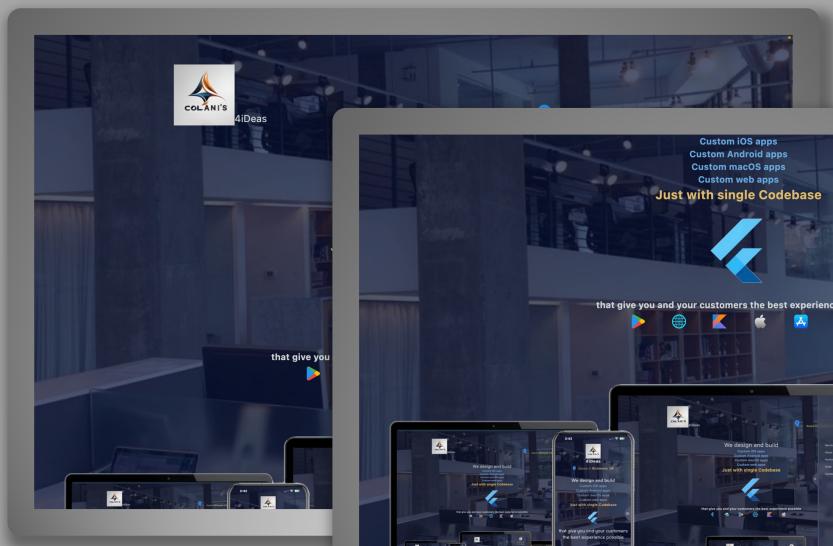

The screenshot shows the pub.dev page for the "auto\_scroll\_image" package version 0.2.5-dev. It was published 8 days ago and is Dart 3 compatible. The package is tagged under FLUTTER, PLATFORM, ANDROID, IOS, LINUX, MACOS, WEB, and WINDOWS. The Readme tab is selected. The package description states: "A Flutter package for auto-scrolling images. Compatible with iOS, Android, MacOS & Web". The Features section lists:

- A Flutter package for auto-scrolling images.
- This package provides a widget for displaying a horizontal list of images that automatically scrolls.
- Users can customize the number of items, item width, and the duration of auto-scrolling.
- For web page take care of width of SizedBox to see image scrolling

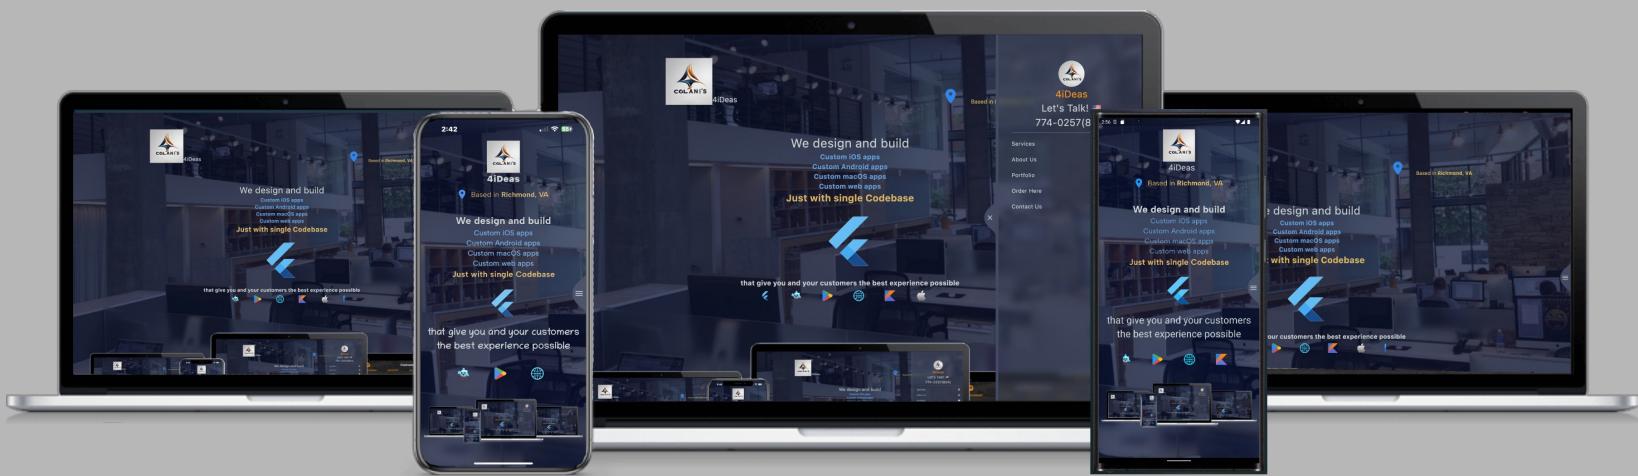

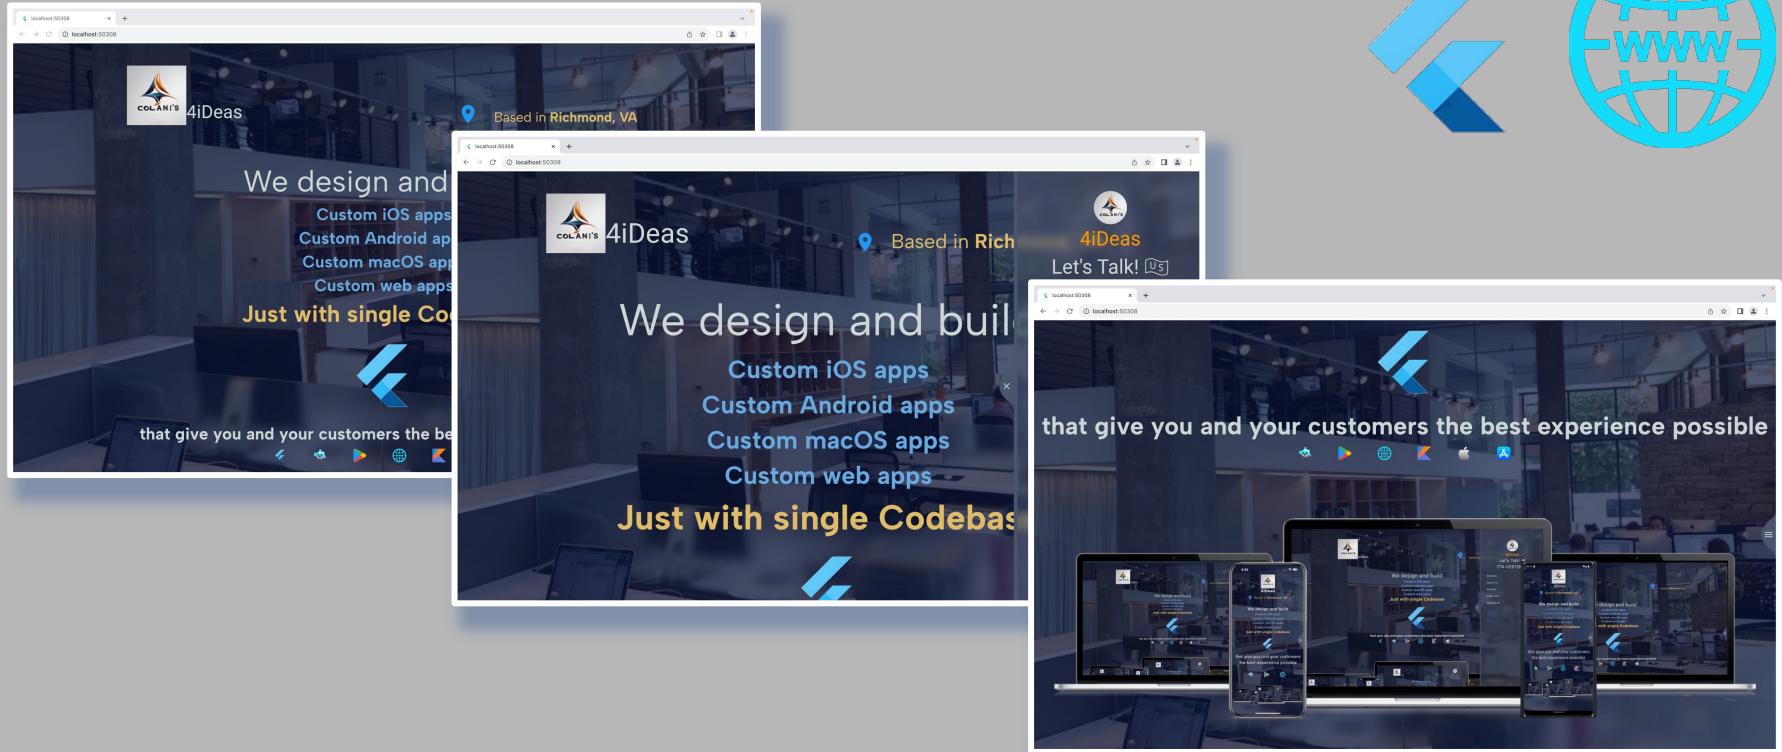

The Getting started section is also visible. On the right side, there is a summary of the package's popularity: 0 likes, 120 pub points, and 9% popularity. It is noted as an unverified uploader. Other sections include Metadata (described as "A Flutter package for auto scrolling images"), Homepage, Repository (GitHub), Documentation, and API reference.

# PHILLIPS INDUSTRY

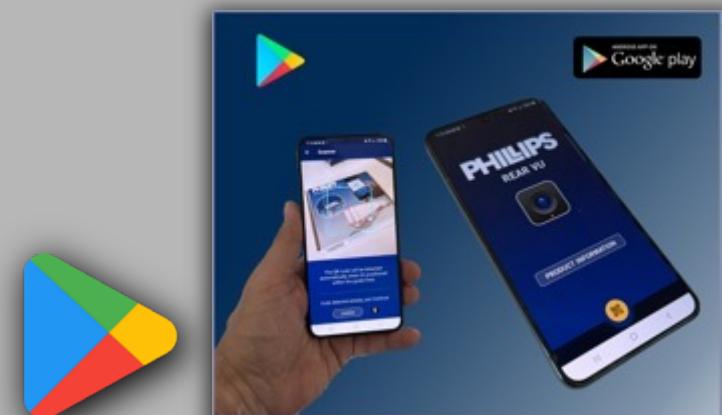

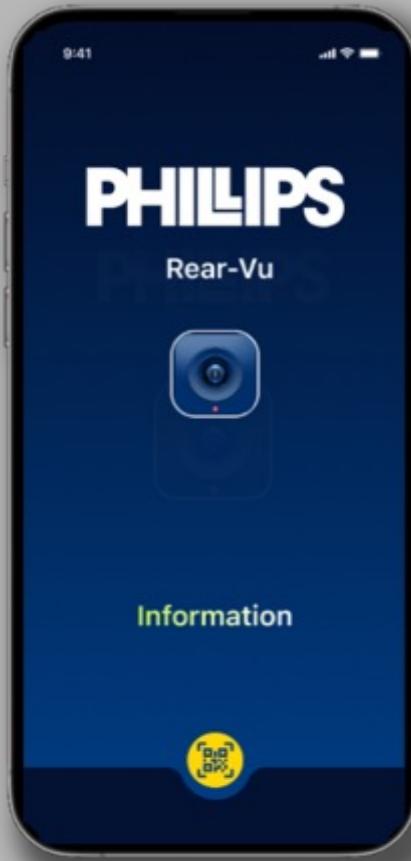

<https://apps.apple.com/us/app/phillips-rear-vu/id1669085162>

A screenshot of the App Store page for the "Phillips Rear-VU" app. The page includes the app icon, rating (4.5), reviews (63), and a brief description: "Show Stream video...". It also features sections for "CATEGORIES" (Business &amp; Productivity) and "DEVELOPER" (REZA HABIBI). The main content area shows screenshots of the app's interface, including a settings menu and a live video feed from a rear-view camera. A QR code is visible on the left. At the bottom, there are links for "Website" and "Support".

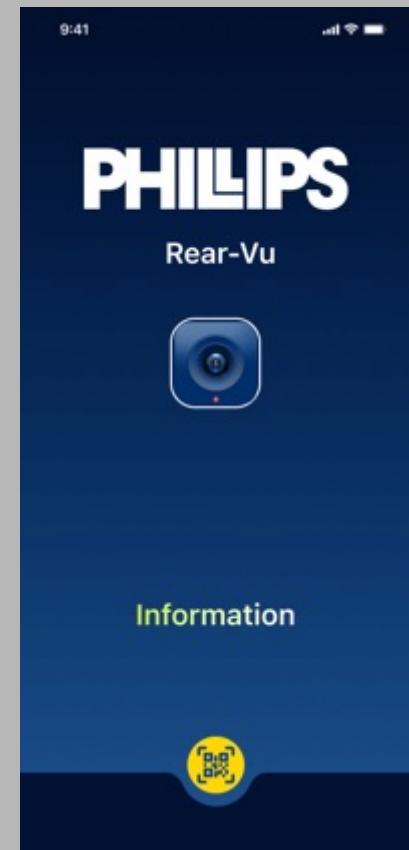

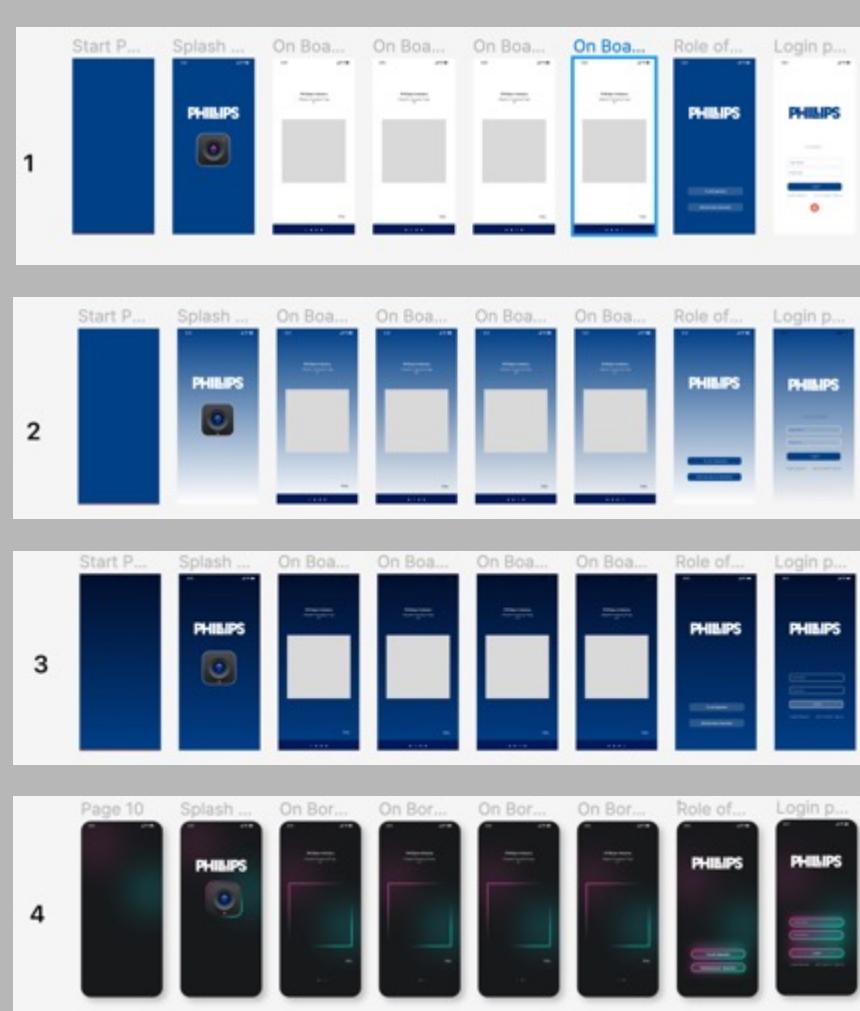

[https://play.google.com/store/apps/details?id=com.phillipsind.phillips\\_rear\\_vu](https://play.google.com/store/apps/details?id=com.phillipsind.phillips_rear_vu)

A screenshot of the Google Play Store page for the "Phillips Rear Vu" app. The page shows the developer as "JohnH'Geleni", a download count of 5+, and a rating of 4.5. It features a large image of the rear-view camera itself. Below the camera are six screenshots of the app's user interface. A green button says "Install on more devices". A note indicates the app is available for all devices. The "Developer contact" section provides a website (https://phillipsind.com/), email (CustomerService-CVP@phillipsind.com), and a privacy policy link. A "More apps to try" section lists "Fasting - Intermittent Fasting Loop Fitness Group". At the bottom, it says "What's new" and "Changed some information in App".

Prototype of  
Phillips backup camera for truck driver

# Phillips Industry

PHILIPS

## SECURED BACKUP CAMERA

Offers increased backup visibility and safety for drivers and pedestrians:

Creates a new level of situational awareness for increased yard safety.

180 degree view allows for visibility of rear bumpers, doors and over 20 feet behind the trailer.

Allows driver to see docking position and alignment to make maneuvering in reverse easier and prevent trailer damage from hard hits.

Protects trailer owner's assets:

Increased visibility decreases accidental damage during backup, avoiding costly repairs and downtime.

Added functionality when paired with a Phillips Connect Bluetooth Device:

Still image uploads to cloud storage when impact or other extreme events are detected.

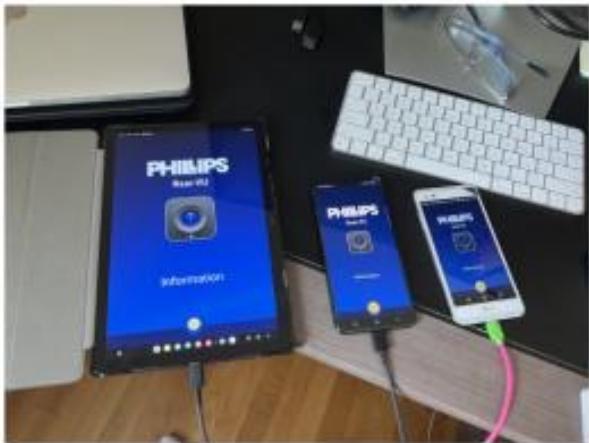

Functional/Diagnostic information provided to telematics to ensure proper operation and monitor driver usage.

## Free iOS application works on any iOS device:

Access to streaming backup camera video for ANY truck driver, regardless of company affiliation.

Adaptive algorithm provides list of available cameras to sync to in most likely order to allow driver to easily find the correct camera when there are many nearby.

The image shows the Apple App Store page for the 'ASDUSA' app. At the top, there's a summary card with the app's logo, name, category (Business), developer (John Colani), language (English), and size (144.4 MB). Below this, five screenshots of the app's interface are displayed. The first screenshot shows the sign-in page with options for 'Sign In' or 'Skip'. The second screenshot shows a welcome message for an anonymous user. The third screenshot displays a menu with categories like 'MARBLE', 'GRANITES', 'QUARTZES', and 'ECO-FRIENDLY MATERIALS'. The fourth screenshot shows a showroom floor with various stone samples. The fifth screenshot provides contact information, including a phone number (1-800-732-8114) and an email address (info@asdesign.com).

# Absolute Stone Design

The image shows a Mac desktop with an Android Studio window open. The window displays the code for the `welcome_page.dart` file. The code is written in Dart and defines a `WelcomePage` stateless widget. It imports various packages including `dart:io`, `package:asdong/components/rounded_button.dart`, `package:asdong/src/screens/background_image.dart`, `package:asdong/src/screens/login_page.dart`, `package:asdong/src/screens/signup_page.dart`, `package:firebase_auth/firebase_auth.dart`, `package:flutter/cupertino.dart`, `package:flutter/material.dart`, and `package:google_fonts/google_fonts.dart`. The `build` method creates a `CupertinoPageScaffold` with a navigation bar and a central text element.

Two smartphones are shown displaying the "Absolute Stone Design" app. The left phone is an iPhone 13 Pro Max running iOS 16, and the right phone is an Android device running Android 12. Both phones show the same welcome screen with a large "ASD" logo, the text "Absolute Stone Design", and three blue rounded button-style buttons labeled "Log In", "Register", and "Sign Out".
